

RISING DRAGON / 2022

BUILD BETTER SPAS

The Rising Dragon Group of Companies began in 2000 with the establishment of the Cover and lighting divisions. Later we added the Plastics and Billiards divisions. All divisions operate ISO9001 manufacturing facilities and were developed for the export market...

Rising Dragon is truly a unique company, blending the best of both Western and Chinese business principles and best practices. This has in turn lead to a company that is open-minded, creative, innovative, competitive, and solution oriented.

Rising Dragon's commitment to superior quality raw materials and excellence in design and manufacturing techniques is positioning us as one of the fastest growing and most reliable suppliers in the global spa industry.

BUILD BETTER SPAS.™

Quality First, Service Oriented

CLIPLESS & BEARINGLESS JETS

One of the first plastic projects Rising Dragon executed was the creation of the now patented “Axis” bearingless jet.

These self-cleaning jets use a floating stainless steel shaft seated into a forward steel bushing, instead of bearings, which can become easily clogged with suspended debris in the water. The pin spins more freely as well delivering a better massage with less horsepower.

We did not stop with this patented idea. Product durability and performance continue to dominate the development focus for all our jet products. We are continually seeking better and more forgiving raw materials and designs to offset end client water chemistry mistakes.

Many new jets have been added to the line up this year, and still more are under development .

Quantum jet technology from Rising Dragon is the only jet offered in the market that effectively deals with the post sale consumer problems

long associated with water chemistry. Patent pending technology eliminates jets popping out and keep both dealers and end consumers from the headaches and costs of after-market service and replacement. All Quantum jets are made with specially formulated plastic that is “tried and true” in all water sanitizers and, of course, our patent pending threaded design that incorporates on and off functions without the use of clips.

We offer full private labeling design faces as well as exclusive co-development of your ideas, so ask us how we can make your insight a reality.

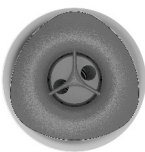

ALPHA JETS II

3" Spinning Jet/
Sterling Gray

A Better Classic Design. The New ALPHA.

Directional Jet

Spinning Jet

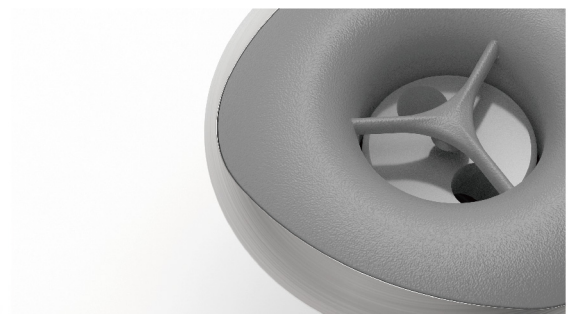

3" Spinning Jet/
Standard Gray

New Alpha is evolved based on RDT'S first generation Alpha, with hard textured plastic parts and smoother profile.

Gloss/Brushed finishes are available on stainless steel part.

Jets Available Sizes (both on directional/
spinning jet)
5"/4"/3"/2"

CLEARCORE™ OZONE REACTION CHAMBER

Almost all spas made these days come with some sort of ozonator or ozone purification system. The fact is when used correctly ozone can really cut the maintenance on a spa and deliver crystal clear water effortlessly. Many people like the idea of a natural system that does not require active involvement of the end customer. However, the challenge for manufacturers is to enable the engineering department to deliver ozone systems that live up to the promises that the marketing department makes.

The first problem lies in the fact that ozone is a gas and we are trying to get it to purify water, a liquid. The best systems on the market use elaborate mixing tanks, specialized injectors, diffusers and often several proprietary set ups all aimed at facilitating an ozone reaction with contaminants in the water.

The CLEARCORE™ Ozone Reaction Chamber merges these separate components into one effective core system, Imagine, one piece to install, which gives you injection, diffusion, mixing, and reaction time. The compact, all-in-one design allows for easy installation either at the factory or in the field and is less than the cost of what some companies would charge for just an injector.

The system is even set up with two small light housings built in to allow the CLEARCORE™ chamber to be backlit with your spas lighting package to make the feature even more noticeable in your customer's eyes.

Finally, an inexpensive system that does it all, is a snap to install and lives up to its billing. No ozone system should be installed without this part.

ActiveSkim™ Filter

The new Active Skim™ Filter Canister from Rising Dragon Plastics combines innovative engineering with minimalist design, giving manufacturers a superior filtration system that can be fitted into most existing spa models.

A key ingredient to the performance of this filter is the perpetual silent skimming action provided at both high and low pumps speeds. There are no gates or telescopic tubes to stick, which can lead to pump cavitation. The tight grate pattern prevents duckies and other floating objects from blocking the filter area.

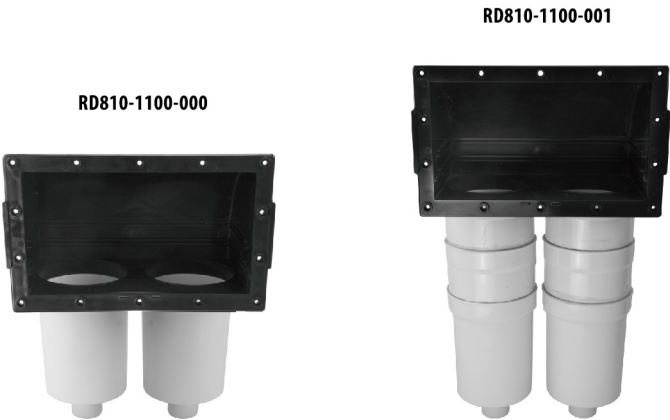

The best part is a particle and hair basket is built right into the floating skimmer, prescreening larger debris prior to the filter itself. When the skimmer is removed from the water the debris is removed with it, unlike skimmer baskets where the debris floats out as soon as the pump is turned off.

The product can be accented with a chrome or even a backlit trim ring and can be private labeled with a customized logo on top of the skimmer.

The LastingScents™ Aromatherapy System

Rising Dragon's **LastingScents™** Aromatherapy System gives spa manufacturers an effective feature with little extra cost and functionality that will drive repeat sales.

While the **LastingScents™** canister itself is comparable with most other existing scent dispensing systems but there is a twist . **LastingScents™** utilizes an adjustable cartridge that allows the customer to turn the scent on and off and even change the intensity of the scent.This means the system works well and the scent lasts between usages.

LastingScents™ can work with either blower or venturi based air injection systems and installs or retrofits in just a few minutes.

An assortment of **LastingScents™** aroma oil cartridges are available and come prepackaged in POP display material,making a new exclusive profit center for you and your dealers.

POOL & SPA LIGHTS

Rising Dragon Technology (RDT) is an advanced product development firm dedicated to creating new LED technologies and applications.

At RDT, we pride ourselves on developing products that are easier to use and install than competitive products and that performs beyond expectations.

While most products in this industry still utilize traditional LEDs: arrays of tiny red, green and blue LEDs haphazardly arranged on a board without regard for proper color mixing and over effect, RDT uses Precision Beam Diffusion™ techonlogy to deliver perfectly mixed TURE color, even white!

Further, we use Wide Radius Projection™ technology to deliver more light to all areas of your pool or spa and create light that is pure, warm and mood enhancing unlike anything else on the market.

Precision Beam Diffusion™ and Wide Radius Projection™ are technologies exclusive to our Evolution and Pinnacle lighting series.

PINNACLE™ SERIES (2 WIRE SYSTEM)

Our Pinnacle™ Series is a breakthrough design that will revolutionize any installation. Combining Precision Beam Diffusion, Wide Radius Projection and newly patented method the Pinnacle™ System really sets the standard for lighting excellence. Like the Evolution system the Pinnacle system still connects to the spa via a 12V AC out connection. This system also uses a Master light or a separate Controller to run the various lighting programs but that is where the similarities end. With the Pinnacle™ System there are no complicated cabling or hub layouts.

Installation is as simple as running one perimeter cable around the spa and using the patented splicing method to attach lights anywhere along this perimeter line.

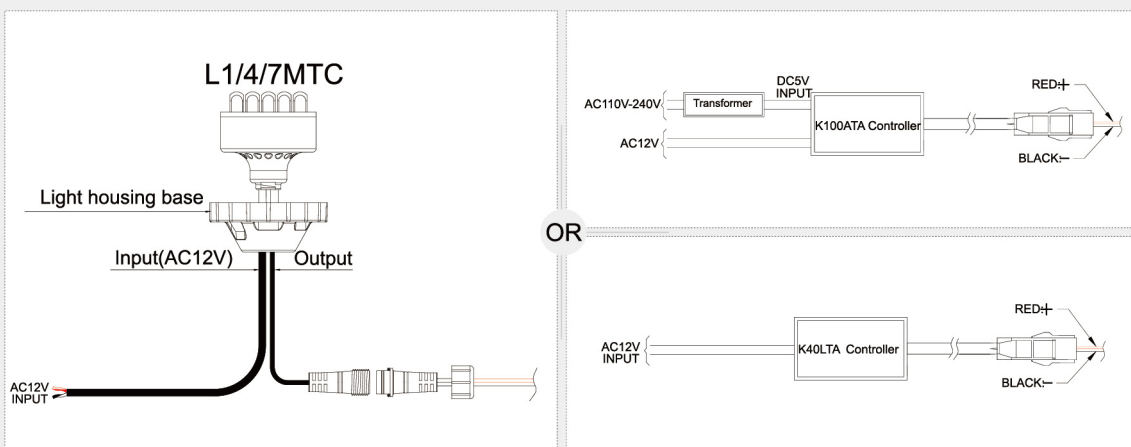

Installation is quicker, easier and cleaner. The key is how the processors communicate with the other lights in the system. Rather than relying on signals being sent to corresponding diode wires, signals are sent and received using special chips sending instructions to each light. Breakthrough methodology that simplifies even the most demanding of lighting applications.

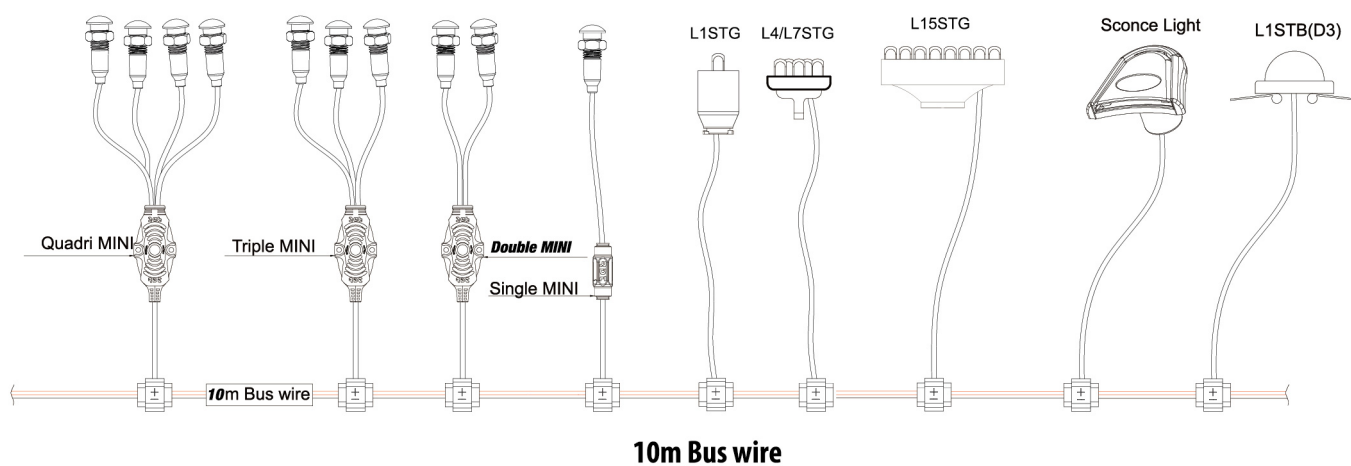

The Pinnacles system is designed to be 100% waterproof and can even be fully immersed in a spa!

Like the Evolution™ Series the Pinnacle™ series also steps down from 12V to 5V to reduce heat and increase your systems the life expectancy while still delivering more light to your eyes with less energy than any product in the industry. It also shares the memory function.

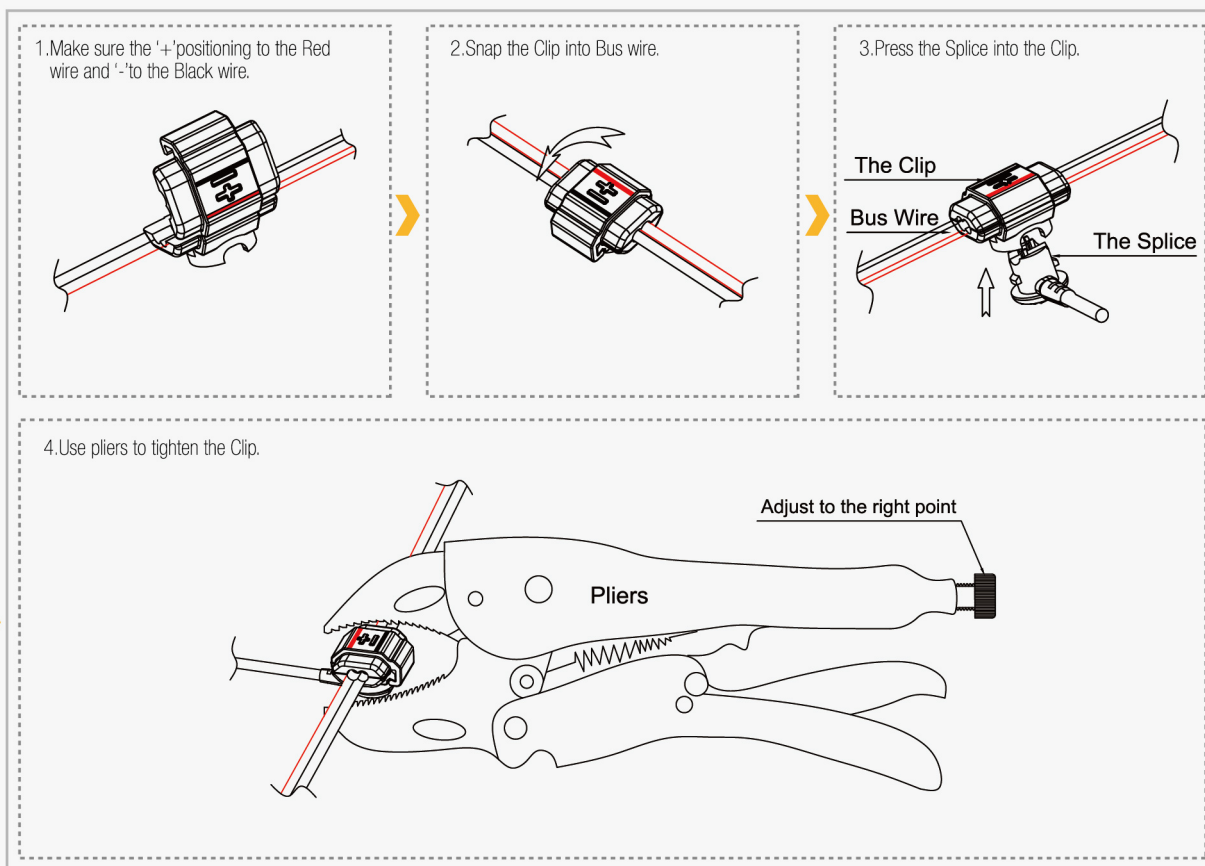

We guarantee that the Pinnacle™ system is superior, less costly, and easier to install than what you are presently using and we back this with a full three-year warranty! Less cable saves you money. Easier Installation saves you time and money! Longer life and easier warranty solutions save you money on the back end!

Now you know why we named this system the Pinnacle™ Series. It is the top of the class for this application!

■ PINNACLE PLUS SERIES (2 WIRE SYSTEM & SPEED CLAMP)

FEATURES:

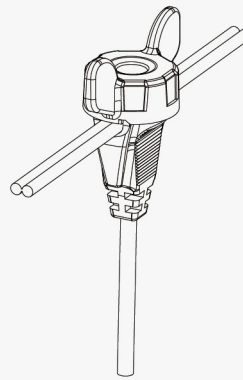

- Pinnacle Lighting Series UPGRADED!
- Work with Gecko & Balboa new top-side control with lighting selections.
- Tools free!
- Improve installation efficiency by 25%!
- Four Pin input, compatible with spa control WITH or WITHOUT PWM data output.

1 Put the bus wire into the slot, according to the color indication.

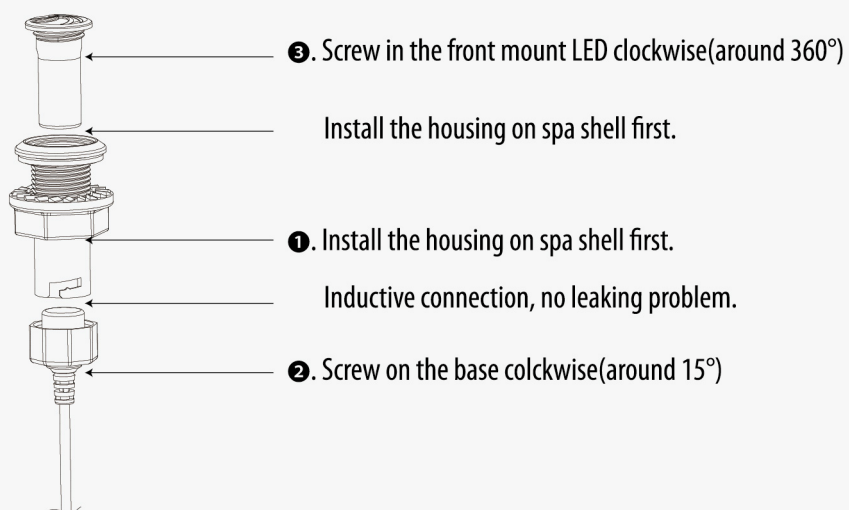

2 Screw on the butterfly cap clockwise to finish installation.

■ **INDUCTIVE SPA LIGHT**

FEATURES:

- Patented "Inductive powered and controlled" spa lighting system
- Totally front accessible light bulb
- 100% leaking free
- Underwater maintenance service guaranteed

NEW LIGHTING SYSTEMS

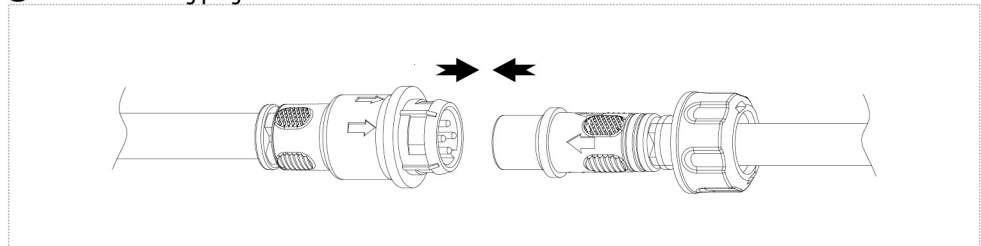

EVOLUTION PLUS SERIES (4 WIRE SYSTEM)
EVOLUTION™ SERIES (4 WIRE SYSTEM)
ELECTRUM™ SERIES
LUMI-SOFT™ LIGHTING SERIES

■ EVOLUTION PLUS SERIES (4 WIRE SYSTEM)

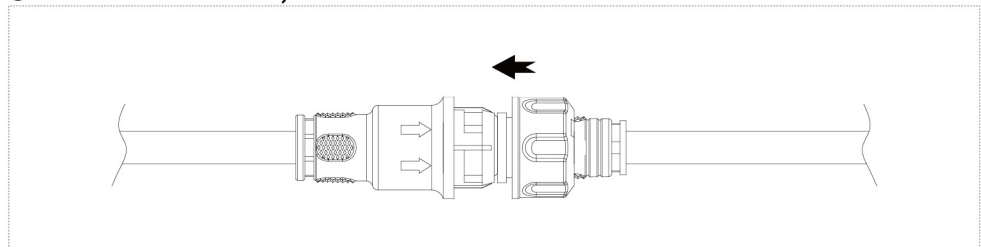

FEATURES:

- Work with Gecko® & Balboa® new top-side control with lighting selections.
- Now even easier to install and service! Tool-less installation with secure connections
- One controller that does it all. Our new smart sensing controller auto detects your spa control system, no matter whose controller it is.
- More lighting options than ever before!
- Same great quality, warranty, and customer support!

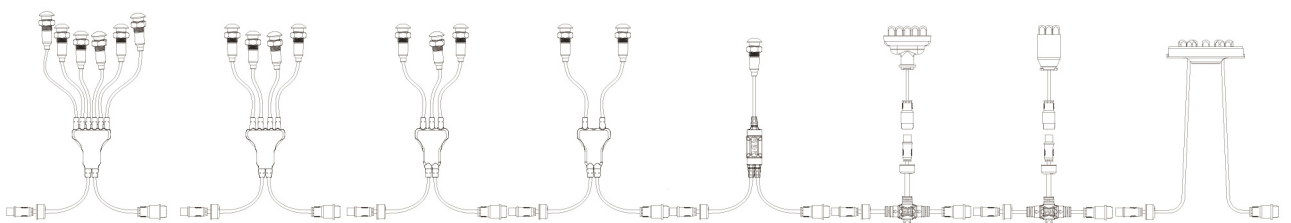

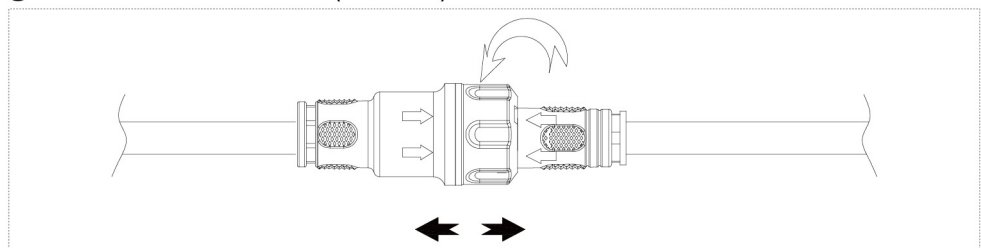

1. Insert the mating plugs.

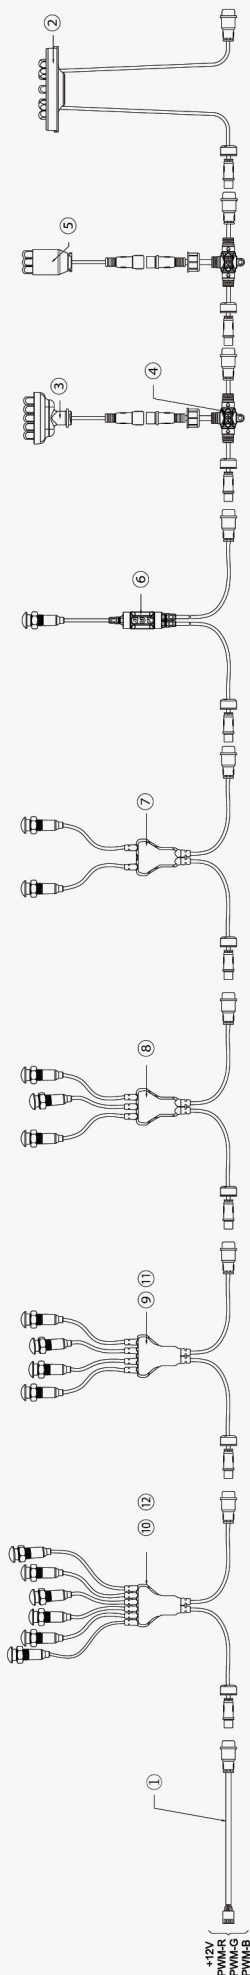

2. Push the nut forward until you hear the “click”. Do not turn the nut.

3. Rotate the nut counter clockwise (around 45°) to disconnect.

- Now even easier to install and service!
- Tool-less installation with quick and secure connections.
- One controller (master light) does it all.
- Our new smart sensing controller auto detects your spa control system, no matter whose controller it is.
- More lighting options than ever before!
- Same great quality, warranty, and customer support!

Supporting "MULTI-ZONE" lighting control
(*applicable for spa control system with MULTI-ZONE function)!

■ EVOLUTION PLUS SERIES (4 WIRE SYSTEM) - Spa Controller

SPECIFICATION

INPUT VOLTAGE : PWM DC 12V

MAX. POWER CONSUMPTION : According to the spa controller output

COLOR : RGB

IP RATING : IP65

MULTI-ZONE FUNCTION: Applicable

AMBIENT TEMP : -4° F ~ 104° F

CERTIFICATIONS : ETL (UL1563, CSA C22.2)

INCLUDED ITEMS : See the attached item breakdown.

■ EVOLUTION™ SERIES (4 WIRE SYSTEM)

Our Evolution™ Series is a molded plug daisy chain cording that utilizes both Precision Beam Diffusion and Wide Radius Projection. This system is designed to connect to spa packs via a 12V AC out connection. This either connects to one of our Master Main lights or to a separate Controller. The Master Light or controller is then connected to one or more slave lights, which are either large main lights or harness arrays of single Points of Light(POLs). This system replaces current hub style systems and other corded systems that are not as easy to use as ours or as waterproof.

The Evolution™ Series steps down from 12V to 5V to reduce heat and increase the life expectancy of your lights greatly. The fact that we still produce light that out shines our competitors is a testament of overall efficiency of this product.

MEMORY FUNCTION

All our lights remember your last setting so you do not have to scroll through every time to find your favorite!

NOTES

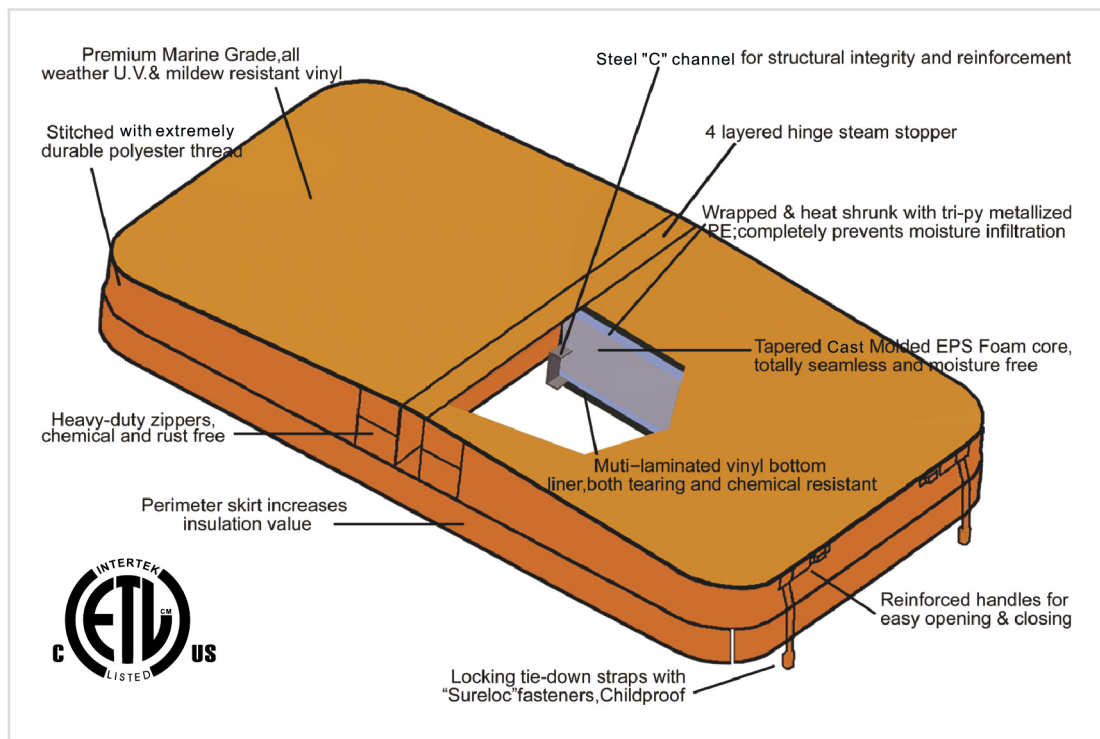

SPA ACCESSORIES

***Designed
Engineered***

Designed,Engineered,and Manufactured in China with Ratings You Can Trust.

■ SPA COVERS

**We offer full cover manufacturing facilities for OEM manufacturers.
We can custom design covers to any size, shape or specification.
All our covers are cETLus tested to meet ASTM ratings.**

■ SPA COVER BAGS

SPA BAG

The perfect packaging solution for shipping spas from the manufacturer to the dealer and from their to the end client.

Environmentally friendly bag is left with the end client as a protective cover if the spa is not used for an extended period or the bags can be returned and reused. No garbage to dispose of.

The bags are built with durable weather and UV resistant tarpaulin material and feature soft foam reinforcement to protect cabinet rails, acrylic shells as specified by the OEM.

Completely customizable to your shipping method and can include velcro, zippers, reinforced strap guides, label window, elastic or belted base and even private label logo printing.

COVER BAG

*Use a bag instead of a cardboard box for the same price!

■ COVER LIFTERS

The cover lifters are made of black powder coated Aluminum Alloy components and 100% stainless hardware, providing years of trouble free performance.

CABINET FREE COVER SHELF

RD801-9200

CABINET FREE COVER BASKET

RD801-8700

CABINET FREE COVER REST

CABINET MOUNT ASSIST LIFT & LOCK

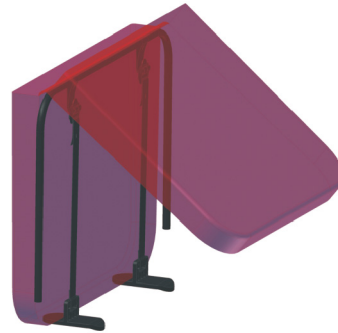

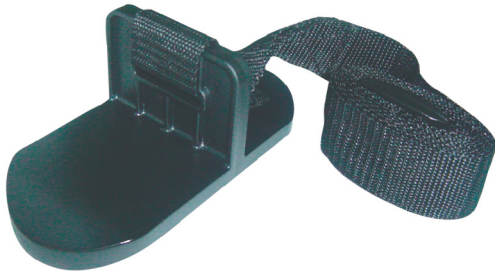

RD801-8500

■ COVER SAVER & HAND RAILS

PATENTED UNIVERSAL COVER SAVER

US patent # 6802086

FEATURES:

- Extend the life of your Spa Cover.
- Transfer the weight from the cover's weakest area to the strongest area.
- Prevent damage to the center seam of the cover.
- Easy to Install. No tools required.
- Universal for any new or existing CENTER BAR COVER LIFTERS.
- Removable or permanent application can be used.

SAFETY HAND RAILS

■ EVA SPA PILLOWS

EVA UNIVERSAL PILLOWS

FEATURES:

- Will not absorb water or deteriorate like PU pillows
- Highly chemical resistant.
- Super comfortable.

Part No.	Description	Case Quantity
RD631-3000	universal pillow	20

EVA ADJUSTABLE PILLOWS

- Adjusts to many heights for a perfect fit

Part No.	Description	Case Quantity	Remarks
RD631- 2000	ADJUSTABLE PILLOW	16	/
